---

En esta ocasión mostramos un paso a paso de como realizar la instalación de VDA de XenDesktop 7.1 sobre un Desktop basado en Windows 8.1 Enterprise, observaréis que el procedimiento es realmente sencillo y que no requiere de muchos conocimientos, pero si que hay que realizar posteriormente el proceso de afinación del sistema operativo antes de ser preparado para el suministro al usuario final.

Arrancaremos por tanto la .ISO correspondiente,

Pulsaremos en "Start",

The screenshot shows the 'Environment' configuration screen in the XenDesktop 7.1 installation wizard. On the left, a navigation pane lists various components: Environment (selected), HDX 3D Pro, Core Components, Delivery Controller, Features, Firewall, Summary, Install, and Finish. The main area is titled 'Environment' and contains a 'Configuration' section. Under 'I want to:', there are two radio button options: 'Create a Master Image' (which is selected) and 'Enable Remote PC Access'. The 'Create a Master Image' option includes the instruction: 'Select this option if you use Machine Creation Services or Provisioning Services to create virtual desktops from this master image.' The 'Enable Remote PC Access' option includes the instruction: 'Select this option to install the Virtual Delivery Agent onto either a physical machine or a virtual machine that has been provisioned without the VDA.' At the bottom right, there are 'Back' and 'Next' buttons.

Seleccionamos el "Create a Master Image" para crear el Template Master a utilizar para el

The screenshot shows the XenDesktop 7.1 installation wizard. On the left, a navigation pane lists the following steps: Environment (checked), HDX 3D Pro (selected), Core Components, Delivery Controller, Features, Firewall, Summary, Install, and Finish. The main content area is titled 'HDX 3D Pro' and contains the text: 'HDX 3D Pro optimizes the performance of graphics-intensive programs and media applications.' Below this is a 'Configuration' section with the question: 'Install the Virtual Delivery Agent (VDA) for HDX 3D Pro?'. There are two radio button options: 'No, install the standard VDA' (which is selected) and 'Yes, install the VDA for HDX 3D Pro'. The 'No' option has a sub-note: 'Recommended for most desktops, including those enabled with Microsoft RemoteApp and Desktop Connector'. The 'Yes' option has a sub-note: 'Recommended if the machine will access a graphics processor for 3D rendering'. At the bottom right, there are 'Back' and 'Next' buttons.

Si desearamos utilizar estas aplicaciones en HDX 3D Pro, rendering, etc, seleccionaríamos la
