Son muchas las ocasiones que tenemos la necesidad de actualizar a una nueva versión de XenDesktop, en esta ocasión mostramos de una forma rápida los pasos a realizar para realizar una actualización rápida y simple a XenDesktop 7.5.

Para realizar la actualización a XenDesktop 7.5 utilizaremos el DVD de instalación de XenDesktop 7.5, y tendremos que cumplir una serie de requisitos o mejor dicho pasos, ya que si nos saltamos alguno de ellos la actualización no se realizará correctamente,

Los pasos a realizar son los siguientes:

- Copia de Seguridad de las Bases de Datos del Delivery Controller.

- Actualización del VDA en la imagen master y en todas las imgánes Master que dispongamos.

- Actualización de un Delivery Controller (todos los componentes).
- Actualización de Studio que nos permitirá actualizar el Site.
- Actualización del resto de Delivery Controllers (todos los componentes)

Cuando arranquemos el Setup de XenDesktop 7.5, lo primero que realizaremos es pulsar sobre Actualizar VDA,
