En esta ocasión mostramos como crear una VM con Hyper-V Manager, la consola básica de gestión del Hypervisor de Microsoft, como podréis observar el proceso es muy sencillo y carece de complejidad. Para crear una nueva VM, seleccionaremos el servidor en cuestión y pulsaremos el botón izquierdo del ratón, seleccionando "New" y "Virtual Machine",

Specify Name	e and Location
Before You Begin Specify Name and Location Assign Memory Configure Networking Connect Virtual Hard Disk Installation Options Summary	Choose a name and location for this virtual machine. The name is displayed in Hyper-V Manager. We recommend that you use a name that identify this virtual machine, such as the name of the guest operating system or work Name: New Virtual Machine You can create a folder or use an existing folder to store the virtual machine. If you of folder, the virtual machine is stored in the default folder configured for this server. Store the virtual machine in a different location Location: C:\ProgramData\Microsoft\Windows\Hyper-V\ If you plan to take snapshots of this virtual machine, select a location that has space. Snapshots include virtual machine data and may require a large amount
